TELEPHONE DIRECTORY

JANUARY 1976

On the Cover – The theme for the 1976 Telephone Directory cover is THE AMERICAN BICENTENNIAL, emphasizing our 200 years of freedom, growth and achievement.

This cover in '76 is designed to highlight the spirit of national achievement, but more specifically NASA's direct contribution to that achievement. The American flag in the Spirit of '76 combined with the American flag now on the Moon symbolizes most profoundly our technological and scientific achievements. The increased number of stars are a graphic testimonial to American growth.

LONG DISTANCE CALLS-For Official Use Only

POLICY REGARDING OFFICIAL LONG DISTANCE CALLS

It is essential that official calls be restricted to the conduct of official business of such urgency that no other means of communication will suffice. When telephone calls to other cities are necessary, every effort must be made to utilize the NASA leased lines and/or the FTS rather than commercial cables.

1. FEDERAL TELECOMMUNICATIONS SYSTEM - In order to receive full benefit of the FTS, it is essential that the following instructions be followed when making calls. To avoid unnecessary calls to the FTS operator for information, each user should maintain a comprehensive list of frequently called numbers.

HOW TO USE- To reach a telephone in a distant city -

- Check to see if the city you are calling is listed.
- Dial the FTS access code, "87" from Clear Lake - "387" from Ellington.
- Wait for second dial tone, then dial the seven digit number as listed.
- It will be necessary to reach the FTS operator in the distant city for information or assistance or to call non-Government numbers. FTS operator numbers are listed below for your convenience.
- FTS CANNOT BE USED FROM NON-GOVERNMENT TELEPHONES AND IS NOT TO BE USED FOR LOCAL AREA CALLS. Local area is defined as that area within a forty-mile radius of JSC.

To call Government agencies served by the FTS-use the FTS Users Guide dated 1976. If the party you are calling is not available and you want to be called back, leave your name, and FTS telephone number. Do not give your access code.

To call commercial numbers in Chicago, IL, area code 312, dial 87-409 + 7-digit number.

To call commercial numbers in Washington, D.C., metropolitan area, dial 87-900+7-digit number.

To call commercial numbers in New York City, area code 212, dial 87-903 + 7-digit number.

To call commercial numbers in California area code 213, dial 87-508 + 7-digit number.

To call commercial numbers in California area code 415, dial 87-905 + 7-digit number.

TO REPORT TROUBLE-Dial your JSC operator and inform her of your telephone trouble.

2. CALLS TO OTHER CITIES-Calls not placed over leased lines or the FTS Network are to be placed with the JSC operator.

3. IN-COLLECT LONG DISTANCE CALLS - DIRECT DIALED - In-collect long distance calls are to be discouraged and if accepted will require certification as to necessity in the performance of official business. If you receive an in-collect direct dial long distance call, ask the operator to wait one moment while you flash the JSC operator. The JSC operator will record the call, then you can begin your conversation.

All You Will Need to Know About Metric

(For Your Everyday Life)

10

Metric is based on Decimal system

The metric system is simple to learn. For use in your everyday life you will need to know only ten units. You will also need to get used to a few new temperatures. Of course, there are other units which most persons will not need to learn. There are even some metric units with which you are already familiar: those for time and electricity are the same as you use now.

BASIC UNITS

- METER:** a little longer than a yard (about 1.1 yards)
LITER: a little larger than a quart (about 1.06 quarts)
GRAM: about the weight of a paper clip

(comparative sizes are shown)

1 METER

1 YARD

25 DEGREES FAHRENHEIT

25 DEGREES CELSIUS

COMMON PREFIXES

(to be used with basic units)

- Milli:** one-thousandth (0.001)
Centi: one-hundredth (0.01)
Kilo: one-thousand times (1000)

For example:

- 1000 millimeters = 1 meter
 100 centimeters = 1 meter
 1000 meters = 1 kilometer

1 LITER

1 QUART

OTHER COMMONLY USED UNITS

- Millimeter:** 0.001 meter diameter of paper clip wire
Centimeter: 0.01 meter width of a paper clip (about 0.4 inch)
Kilometer: 1000 meters somewhat further than 1/2 mile (about 0.6 mile)
Kilogram: 1000 grams a little more than 2 pounds (about 2.2 pounds)
Milliliter: 0.001 liter five of them make a teaspoon

OTHER USEFUL UNITS

- Hectare:** about 2 1/2 acres
Tonne: about one ton

TEMPERATURE

degrees Celsius are used

Note: This chart may be reproduced.

- The annual hurricane season is from June 1 through November 30 with the peak period from July through September. JSC has prepared detailed plans in the event that a hurricane threatens this immediate area. Each directorate and program office has designated a representative to assist in the implementation of storm protection procedures.
- When it has been determined that a hurricane is threatening this area, JSC employees will be kept informed of appropriate plans and procedures through the Center's closed circuit television system or by recorded telephone messages on extension 6281. Notice of changes in work assignments and the possible closing of various Center facilities will be disseminated by these media as well as through normal administrative channels.
- All employees, prior to their departure from the Center, should secure their work areas to minimize wind and water damage. Classified information should be placed in proper storage; other important materials should be protected as feasible; and electrical appliances and equipment should be unplugged and stored as appropriate.
- JSC employees are encouraged to be aware of the possibility of hurricanes and to make any necessary personal preparations well in advance of a possible storm.
