LONG DISTANCE CALLS — For Official Use Only

POLICY REGARDING OFFICIAL LONG DISTANCE CALLS

It is essential that official calls be restricted to the conduct of official business of such urgency that no other means of communication will suffice. When telephone calls to other cities are necessary, every effort must be made to utilize the FTS rather than commercial cables. The FTS system is available on an around the clock basis. For assistance after hours dial the Washington, D.C. FTS operator.

1. FEDERAL TELECOMMUNICATIONS SYSTEM — In order to receive full benefit of the FTS, it is essential that the following instructions be followed when making calls. To avoid unnecessary calls to the FTS operator for information, each user should maintain a comprehensive list of frequently called numbers.

HOW TO USE — To reach a telephone in a distant city -

- Check to see if the city you are calling is listed.
- Dial the FTS access code, "87" from Clear Lake - "387" from Ellington.
- Wait for second dial tone, then dial the 7-digit number as listed.
- It will be necessary to reach the FTS operator in the distant city for FTS information or assistance or to call non-Government numbers. FTS operator numbers are listed on the following pages for your convenience.
- FTS CANNOT BE USED FROM NON-GOVERNMENT TELEPHONES AND IS NOT TO BE USED FOR LOCAL AREA CALLS. Local area is defined as that area within a 40-mile radius of JSC.

COST — Charges for FTS usage are based on the number of calls made, not the length of each call. The current cost per call is approximately one dollar. In an effort to reduce the cost of FTS service, employees are requested to keep FTS calls at a minimum. Several suggestions for reducing the number of calls are as follows.

- Combine calls whenever possible. If more than one person in a work area has a need to speak with a person at the called location, combine both conversations in one call.
- Plan your call before placing it to avoid additional calls on the same subject. FTS charges are based on the number of calls made, not the length of each call.
- "Hold" briefly if the called party is speaking on another extension rather than requesting a return call or replacing the call at a later time.
- If you need to speak with a second person at the called location, request the called party to transfer your call. Also request that your call be transferred if the called party has been relocated to another extension.

- e. Dial carefully. A completed incorrect FTS call costs the same as a correct one.
- f. Terminate FTS calls as soon as your official business is concluded. Even though lengthy calls do not directly increase FTS costs, they do impact the FTS network busy condition which could, in time, result in a higher cost per call.

To call Government agencies serviced by the FTS, use the FTS Users Guide dated 1977. If the party you are calling is not available and you want to be called back, leave your name and FTS telephone number. Do not give your access code.

To call commercial numbers in Illinois, area code 312, dial 87-312 + 7-digit number.

To call commercial numbers in Washington, D.C., metropolitan area, dial 87-202 + 7-digit number.

To call commercial numbers in New York City area code 212, dial 87-212 + 7-digit number.

To call commercial numbers in California area code 213, dial 87-213 + 7-digit number.

To call commercial numbers in California area code 415, dial 87-415 + 7-digit number.

To call commercial numbers in Massachusetts area code 617, dial 87-617 + 7-digit number.

To call commercial numbers in Georgia area code 404, dial 87-404 + 7-digit number.

2. CALLS TO OTHER CITIES — Calls not placed over the FTS Network are to be placed with the JSC operator.

3. IN-COLLECT LONG DISTANCE CALLS — DIRECT DIALED — In-collect long distance calls are to be discouraged and if accepted will require certification as to necessity in the performance of official business. If you receive an in-collect direct dial long distance call, ask the operator to wait one moment while you flash the JSC operator. The JSC operator will record the call, then you can begin your conversation.

TO REPORT TROUBLE — Dial the JSC operator and report your telephone

THE NASA VOICE TELECONFERENCING NETWORK:

The NASA Voice Teleconferencing Network connects major NASA installations and contractor locations through the use of amplified telephone facilities. The network is intended to enable NASA to continue the effective management of its widespread programs by augmenting and replacing meetings which previously required travel.

The network consists of conference rooms equipped with overhead speakers/microphones installed in permanent locations (4-Wire) and 50A Portable two microphones/one loud speaker telephone unit (2-Wire).

Users of the network (4-Wire and 2-Wire) may be connected to the Federal Telecommunications Systems (FTS) and the commercial (DDD) network via operator manned voice conference consoles located at MSFC. DIAL FTS; 872-4100.

For specific operating instructions, users of this system should refer to the NASA Teleconference Directory.

THE NASA FACSIMILE TELECONFERENCING NETWORK:

The NASA Facsimile Teleconferencing Network is a data network intended to transmit documents or figures to be made into vugraphs at the receiving installation or otherwise used to support NASA Voice Teleconferencing. The facsimile transceivers are also used to transmit drawings, reports, etc., in support of NASA programs.

Present equipment utilized in the network is a Model 100 Rapifax Facsimile Transceiver capable of transmitting an 8-1/2 x 11 inch document in 2 minutes or less. Features include unattended operation and automatic document feed.

Requirements for facsimile transmissions to or from the FTS or commercial network can be completed through the Gateway Bridge; however, stations not on the Facsimile System must be equipped with a remote control unit to receive in a broadcast arrangement. The telephone number for the Gateway Operator from stations on the Facsimile System, 872-1234 FTS, or 205/453-1234 commercially.

For specific operating instructions, users of this system should refer to the NASA Teleconference Directory.

Documents may be transmitted to a single station or broadcast simultaneously up to 14 stations utilizing a broadcast arrangement. Station-to-station calls may be made by dialing the number listed. Broadcast transmissions may be accomplished by dialing the broadcast operator at 872-5381. FTS operating instructions are listed on the unit. Station locations, contacts and station numbers follow:

All You Will Need to Know About Metric

(For Your Everyday Life)

10

Metric is based on Decimal system

The metric system is simple to learn. For use in your everyday life you will need to know only ten units. You will also need to get used to a few new temperatures. Of course, there are other units which most persons will not need to learn. There are even some metric units with which you are already familiar: those for time and electricity are the same as you use now.

BASIC UNITS

- METER:** a little longer than a yard (about 1.1 yards)
LITER: a little larger than a quart (about 1.06 quarts)
GRAM: about the weight of a paper clip

25 DEGREES FAHRENHEIT

25 DEGREES CELSIUS

(comparative sizes are shown)

COMMON PREFIXES

(to be used with basic units)

- Milli:** one-thousandth (0.001)
Centi: one-hundredth (0.01)
Kilo: one-thousand times (1000)

For example:

- 1000 millimeters = 1 meter
 100 centimeters = 1 meter
 1000 meters = 1 kilometer

1 LITER

1 QUART

OTHER COMMONLY USED UNITS

- | | |
|--------------------------------|---|
| Millimeter: 0.001 meter | diameter of paper clip wire |
| Centimeter: 0.01 meter | width of a paper clip (about 0.4 inch) |
| Kilometer: 1000 meters | somewhat further than 1/2 mile (about 0.6 mile) |
| Kilogram: 1000 grams | a little more than 2 pounds (about 2.2 pounds) |
| Milliliter: 0.001 liter | five of them make a teaspoon |

OTHER USEFUL UNITS

- Hectare:** about 2 1/2 acres.
Tonne: about one ton

TEMPERATURE

degrees Celsius are used

- The annual hurricane season is from June 1 through November 30 with the peak period from July through September. JSC has prepared detailed plans in the event that a hurricane threatens this immediate area. Each directorate and program office has designated a representative to assist in the implementation of storm protection procedures.
- When it has been determined that a hurricane is threatening this area, JSC employees will be kept informed of appropriate plans and procedures through the Center's closed circuit television system or by recorded telephone messages on extension 6281. Notice of changes in work assignments and the possible closing of various Center facilities will be disseminated by these media as well as through normal administrative channels.
- All employees, prior to their departure from the Center, should secure their work areas to minimize wind and water damage. Classified information should be placed in proper storage; other important materials should be protected as feasible; and electrical appliances and equipment should be unplugged and stored as appropriate.
- JSC employees are encouraged to be aware of the possibility of hurricanes and to make any necessary personal preparations well in advance of a possible storm.
